

# Mobile Application Development 10/10 good

## APK file build

When the code is  
compiled on emulator. Then go  
to the terminal and give  
command

"flutter build apk"

After being processing the  
build apk file will be  
saved in project file.

## Changing directory name:

For changing the directory name  
go to the android > app > src  
> main > ~~res~~ AndroidManifest.xml Then change  
the name in application
